

THE GALAXY

Age: 6 and up

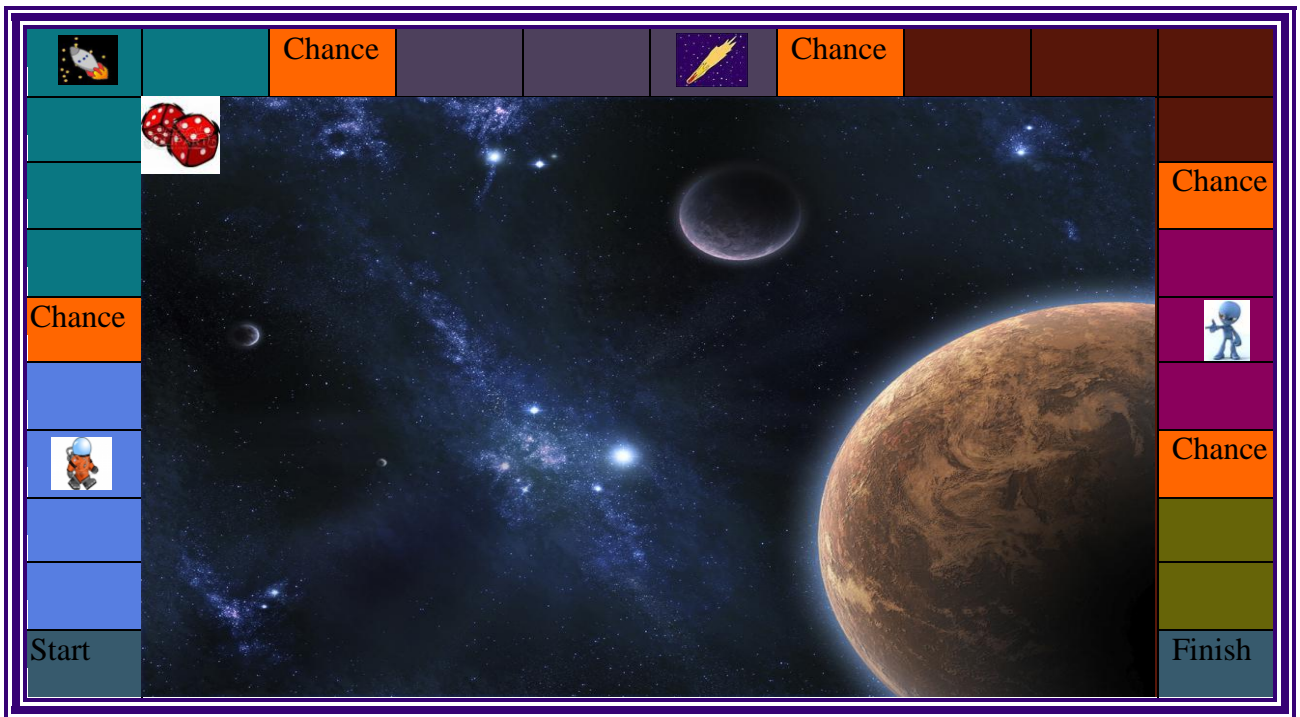

Limit: 4 people

Items: Defense Cards, 4 moving pieces, and one dice.

Direction: The point of the game is to win. To win you have to get to the finish. There will be four pieces and you choose one. You roll a dice and you move your piece depending on the number you got on the dice.

Attack and Defense: When you land on the same box as another person you have to attack them because there can only be one person per box. In order to attack you each roll a dice and the winner stays on the box and the loser goes back one box. When you defend you have to use your defense points. You get defense points by the number you roll on your dice. Every time you roll your dice you get the same amount of defense points as the number. When you want to defend you buy a defense card with your points. Only you know what defense you got. When the opponent lands on the box you put your defense on they will suffer the punishment of landing on it. For instance, like one card can be like lose a turn or make the opponent move backspaces.

Chance Cards: These cards are on the boxes when you start. When you land on it you will have to draw one chance card. It may be good or bad.

Have fun playing!!! 😊
And Remember NO Cheating
